

Mighty Metals LKS2 Homework

This term our new topic is mighty metals. You have 12 different activities to choose from. As this is a six-week term I would like you to complete 3 activities. The dates to hand your topic homework in are as follows:

Thursday 16th January 2020

Thursday 23rd January 2020

Thursday 6th February 2020

I expect you to put as much effort into your homework as possible. By high expectations I mean:

- presentation should be neat, with writing either in pencil or pen depending if you have achieved your pen licence
- writing should be on the lines, with any headings or sub-headings underlined
- work should be presentable not rushed the night before.
- Any diagrams, pictures or photographs should be labelled and have a caption underneath.
- Organisational devices such as bullet points, numbers, sub-headings can be used to help the reader.
- If a creative activity has been submitted then an explanation should still be written in your book explaining how you made your model and why you used certain resources.
- Any pictures or photographs need to be stuck in your book.
- Write information out in your own words, don't just copy and paste.
- Each piece of homework should clearly state which activity you have picked. This can be either done by writing out the activity or stating which number activity it is.

You should be proud of your work and remember the more effort you put in the more points you will achieve. A prize will be awarded to the child who has gained the most points. This will be announced the last day of term Friday 14th February 2020.

You can use books in class and the laptops for research purposes during lunchtime.

Any problems or concerns then please let Mrs Fairless know.

Thank you and good luck!

Mrs Fairless
